a clean fresh
way to be on
the water*

Welcome to Nauticraft

Pedal Propulsion

The Encore P/E has two independent drive systems for side by side pedaling, each turning a 15" propeller. The comfortable recumbent style seats are rotationally molded, covered with 1 1/2" dry fast foam and Marine grade vinyl covering. A steering handle on the starboard side easily controls the dual rudder steering system.

Electric Motor Propulsion

The Encore P/E also features a 55 lb. thrust Minn Kota salt water electric trolling motor, a time proven rig used by the recreational fishing industry. The components, including the Minn Kota motor control box, Group 27+ deep cycle battery*, and 6 amp Heavy Duty Recreational single bank charger are hidden away in the Encore's covered front storage compartment. A compact remote with a forward-reverse switch and twist-knob speed control is conveniently mounted next to the steering handle for easy access.

* Battery not included

+ Manufacturer's recommended size; check with dealer for other size options
