

The Encore by Nauticraft

perfect choice for couples and families

With side by side fully padded recumbent seats and a bench seat in the rear, a group of 4 can take a spin out on the lake with ease.

But don't let the size fool you, one person can navigate it handily through the water, regardless of the propulsion method.

Conveniently placed steering handle allows the pilot control of the maneuverable double rudder system.

Plenty of storage, both in the front and under the rear deck, for towels, beverages or electronics.

The Encore's hull is self bailing, with water flowing freely in and out of the drive shaft channels.

*Encore P only:
Sea weed removal port*

Self-draining cockpit

Take Two!

Or three, or four...

And then glide across a lake, cruise an inland waterway, cut across the bay. Revel in the sights and sounds along the way. Cultivate the natural wonder and curiosity in your young passengers. Help yourself to some quality time, and get to really know each other. Encore is an adventure, just waiting to happen to you.

ENCORE P

Pedal Propulsion

Two Independent drive units for side by side pedaling. Front and rear storage compartments are fully functional in this pedal only version. In the rear compartment you can find the “clean out hole”, handy in removing weeds from the 15” propellers.

ENCORE P/E

Pedal and Electric Motor Propulsion

Retaining the pedal drive system of the Encore P, this model features a 55 lb. thrust Minn Kota salt water electric trolling motor, a time proven rig used by the recreational fishing industry. The Lithium Ion 12v 100Ah battery is hidden away in the Encore’s rear storage compartment. Battery is easily removeable for charging with included charger using 120 house current. A variable speed controller with forward-reverse and twist-knob speed control is positioned conveniently between the two operator seats..

ENCORE E

Electric Motor Propulsion

This model converts the Encore P/E to a true all electric boat, using the 55lb. thrust 12 volt Minn Kota salt water electric motor. The elimination of the pedal drive system gives a spacious interior for comfortable luxurious cruising.
