Length	14' 2"
Draft	1' 9"
Weight	425 lbs. w/o battery
Speed Potential	3.5 – 4 mph

Welcome to Nauticraft

Pedal Propulsion

The Encore P/E has two independent drive systems for side by side pedaling, each turning a 15" propeller. The comfortable recumbent style seats are rotationally molded, covered with 1 1/2" dry fast foam and Marine grade vinyl covering. A steering handle on the starboard side easily controls the dual rudder steering system.

Electric Motor Propulsion

The Encore P/E also features a 55 lb. thrust Minn Kota salt water electric trolling motor, a time proven rig used by the recreational fishing industry. The Lithium Ion 12v 100Ah battery, weighing only 11 pounds, is conveniently located in the rear storage compartment, where it is easily removeable for charging with a 120 volt (ordinary house current) included charger.

The variable speed twist handle control giving both forward and reverse, is located between the front seats.

Also on this control is a button push-to-test battery meter to get an instant status of remaining battery life.
